What's Inside

This report delivers an in-depth performance analysis focused on the cost-efficiency of customer acquisition strategies across key digital advertising channels. Specifically, it examines and compares the Cost Per Acquisition (CPA) metrics between influencer-driven campaigns and direct advertising.

The analysis is further refined through seasonal segmentation (Winter and Spring) and customer type classification (New vs Returning), offering granular insight into how each strategy performs under varying conditions. The findings are intended to guide future media planning, campaign budgeting, and audience targeting decisions with a data-driven approach.

Cost Per Acquisition (CPA) Analysis by Advertising Channel

Objective: To evaluate and compare the Cost Per Acquisition (CPA) across two major marketing channels—Influencer campaigns and Direct Ads—with segmentation by seasonality and customer type.

1. Overall CPA Performance

Channel	CPA (\$)
Direct Ads	4.55
Influencers	5.02

Observation: Direct Ads have demonstrated a lower overall cost to acquire a customer, making them the more efficient option in broad terms.

2. CPA by Season

Winter Season

Channel	CPA (\$)
Direct Ads	4.68
Influencers	4.54

Insight: During the winter season, influencer campaigns slightly outperformed direct ads in terms of cost-efficiency, suggesting favorable audience responsiveness in colder months.

Spring Season

Channel	CPA (\$)
Direct Ads	4.43
Influencers	5.58

Insight: In spring, direct ads were substantially more efficient than influencers, indicating a seasonal shift in engagement or media cost dynamics.

3. CPA by Customer Type

New Customers (Overall)

Channel	CPA (\$)
Direct Ads	4.18
Influencers	5.44

Insight: Direct Ads are more effective in acquiring new clients, delivering a significantly lower CPA.

Returning Customers (Overall)

Channel	CPA (\$)
Direct Ads	4.99
Influencers	4.68

Insight: Influencer campaigns were slightly more cost-effective when targeting returning customers.

4. CPA by Customer Type and Season

New Clients – Winter

Channel	CPA (\$)
Direct Ads	4.21
Influencers	4.89

New Clients – Spring

Channel	CPA (\$)
Direct Ads	4.15
Influencers	6.06

Returning Clients – Winter

Channel	CPA (\$)
Direct Ads	5.25
Influencers	4.25

Returning Clients – Spring

Channel	CPA (\$)
Direct Ads	4.75
Influencers	5.18

Insight:

- For new client acquisition, Direct Ads consistently outperformed Influencers in both seasons.
- For re-engaging existing customers, Influencers were more efficient in winter but less so in spring.

5. Conclusion

Key findings are summarized as follows:

- ☒ **Direct Ads proved to be the most cost-effective channel** for customer acquisition overall.
- ☒ **New clients were acquired at significantly lower CPAs via Direct Ads**, especially during the spring season.
- ☒ **Influencer campaigns demonstrated their highest value in winter**, particularly when targeting returning clients.
- ☒ These insights provide actionable guidance for **optimizing media budget allocation**, supporting smarter and more efficient marketing investment decisions in future campaigns.
